DEPARTMENT OF THE ARMY
HEALTH SERVICES COMMAND
CHAMPUS CATASTROPHIC CASE LIMITS
GATEWAY CATCHMENT AREAS

SUMMARY

At the request of HSC a study was conducted to compute the case total limits for the catastrophic re-insurance payments to be made to the thirteen Army Gateway sites beginning FY 1992. The Composite Institutional Record V2.0 was used to derive case totals and included both institutional and professional services CHAMPUS payments. CY 1990 data were used to derive estimates. CY 1990 data were used to insure that only complete case data were employed to set the actual cutoffs. Using these CY 1990 cases, various catastrophic cutoffs for these hospitalizations were compared to the actual grand total government payments for all CHAMPUS care provided in that catchment area during the same period. From this comparison various case cutoffs were derived. The catastrophic case cutoffs which will be implemented by HSC are presented for each Gateway site in Table 1. Case cutoffs range from a low of \$5,500 at Ft. Drum to a high of \$167,000 at Ft. Campbell. These cutoffs when implemented by HSC, will result in approximately 5% of the total CHAMPUS budget of each Gateway site being paid through catastrophic re-insurance each year. For example based on the analysis, once a case reaches \$93,000 at Ft. Hood, HSC would assume liability for all payments above that amount. Based on the hospital discharges occurring in CY 1990, that cut-off would have resulted in \$1,693,466 paid to Ft. Hood through catastrophic re-insurance assuming all care was actually paid in CY 1990.

Appendix A lists the actual computation for each site and displays the cutoff associated with various percentages of the budget paid as catastrophic re-insurance. Appendix B displays catastrophic cases for each Gateway catchment area which satisfied the cutoff criteria during the CY 1990 study year. It should be noted that the methodology derived catastrophic case cutoffs using hospital discharges which occurred in CY 1990. Examination of Appendix B will demonstrate that at least for some of the longer hospital lengths of stay not all of the hospitalization may have been paid, or even occurred in CY 1990. For purposes of cutoff computation the total cost was arbitrarily assumed to have been paid in the same year as the discharge. This assumption was employed to use a prevalence-based estimate to project catastrophic cases which would be expected to arise throughout a given budget year. In any year there will be hospitalizations which surpass the catastrophic limit which were admitted during the previous year, or discharged and partially paid during the following year, as well as hospitalizations which are admitted, discharged and paid for within the same year. It

was determined through testing with several Gateway sites that the above methodology provides a very accurate estimate of future catastrophic re-insurance payments.

To demonstrate the application of the catastrophic re-insurance program two Gateway sites were examined in detail using FY 1991. These sites are presented in Table 2. The actual catastrophic re-insurance payments which would have been made to Eisenhower AMC and West Point MEDDAC, had the model been employed during FY 1991 are presented. From the HSC catastrophic re-insurance program Eisenhower AMC would have received \$632,777 and West Point MEDDAC would have received \$281,852 in FY 1991 catastrophic re-insurance payments. It is emphasized that these re-insurance payments are for funds which would have actually been spent in each catchment area during FY 1991. During FY 1991 the total budgetary outlay of CHAMPUS funds in the Eisenhower AMC catchment area was \$13,530,514 and in the West Point MEDDAC catchment area the outlay was \$5,826,312. The above catastrophic re-insurance payments total 4.7% of the Eisenhower AMC catchment area total FY 1991 CHAMPUS budget and 4.8% of the West Point MEDDAC area CHAMPUS budget. Thus, the Gateway site catastrophic re-insurance program implemented by HSC demonstrates high predictive validity.

TABLE 1
ARMY GATEWAY PROGRAM
HSC CHAMPUS CATASTROPHIC CASE LIMIT ESTIMATIONS
CALENDAR YEAR 1990

CATCHMENT AREAS	TOTAL CHAMPUS COSTS	CATASTROPHIC CASE CUTOFF	CATASTROPHIC PAYMENT TOTAL
BEAUMONT AMC	\$16,128,741	\$80,000	\$797,963
